

RECUR

The Pull Payments Rail for Stablecoins
Making Stablecoins Flow.

The Problem

Crypto is push-only. Merchants cannot pull payments.
\$300B+ stablecoins are static balances, not active money.

The Solution

Recur unlocks pull payments in crypto.

One approval → recurring charges → global by default.

MVP live on stablecoins.

Why Now

Stablecoins \$300B+ and growing.

Subscriptions \$1T+ economy.

Account abstraction makes recurring possible today.

The Opportunity

Subscriptions = first trillion-dollar use case.

Then: SaaS, lending, payroll, remittances, donations.

Recur = the rails for all recurring flows in crypto.

Moat

Category-defining domain: Recur.com

Protocol-level innovation, not just a feature.

Network effects from merchant + consumer adoption.

Raise

Raising \$2M Seed @ \$10M post.
